

Summary

Date & Time: April 08, 2023 11:11

Meeting Id: meetId

djadhav20comp@student.mes.ac.in

Attendee No :2

Duration: 3

Summary:

Jayesh, Dhananjay K, Dan and Jeff have been selected for hackathon. They have to study different papers and prepare a plan for the project. They need to make an extension and capture the transcript from the mid and assign work to everyone.

Next meeting is on Tuesday 10:00 AM. Capture the transcript from the mid and send to the machine learning model, process it and generate summary and write. Ohh Python functions where they can send it to e-mail and make entries into database. They need to create different different models. Jayesh r will send mail to each and everyone that the meeting is going to be next week so that everyone can follow up.

Dhananjay K will give them the view and download button so that someone wants to view they can view over there on the answer. If someone wants their data on their local system, they can download it. Jayesh r will end the conversation.
